# EN Engineering Offers Pipeline Record Audits

EN Engineering is uniquely positioned to help natural gas and liquid pipeline operators perform record audits necessary to maintain compliance with federal regulations.

- We focus on natural gas and liquids pipelines
- We have decades of first-hand experience operating assets of major natural gas and liquids pipelines
- We have extensive industry knowledge necessary to conduct comprehensive and accurate record audits
- Our engineering staff is fully versed in interpretation of applicable operating codes & standards
- We have a history of developing and optimizing client integrity management programs
- We offer significant experience related to identifying integrity threats
